

BIM for Mega Projects Training Course

Professional Development Training Course Outline

Category	Architectural Engineering	Duration	5 Days
Base Fee	\$1,500 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

Building Information Modeling (BIM) for Mega Projects Training Course is designed to equip professionals with advanced digital construction capabilities required for large-scale, complex infrastructure and building developments. As mega projects continue to redefine global skylines such as airports, smart cities, highways, industrial zones, and high-rise clusters BIM has become the backbone of efficient planning, coordination, and lifecycle management. This course integrates cutting-edge BIM workflows, 3D/4D/5D modeling, cloud collaboration, and digital twin technologies to enhance project accuracy, reduce cost overruns, and eliminate construction conflicts.

The training emphasizes real-world application of BIM across multidisciplinary teams including architecture, engineering, construction, and facility management. Participants will gain hands-on expertise in clash detection, quantity take-off, construction sequencing, cost integration, and sustainability analysis. By focusing on mega project execution strategies, this course prepares professionals to manage complex datasets, streamline stakeholder coordination, and drive data-driven decision-making in high-value infrastructure projects using globally recognized BIM standards and trending digital construction methodologies

Programme Curriculum

BIM for Mega Projects Training Course

Introduction

BIM for Mega Projects Training Course is designed to equip professionals with advanced digital construction capabilities required for large-scale, complex infrastructure and building developments. As mega projects continue to redefine global skylines such as airports, smart cities, highways, industrial zones, and high-rise clusters BIM has become the backbone of efficient planning, coordination, and lifecycle management. This

course integrates cutting-edge BIM workflows, 3D/4D/5D modeling, cloud collaboration, and digital twin technologies to enhance project accuracy, reduce cost overruns, and eliminate construction conflicts.

The training emphasizes real-world application of BIM across multidisciplinary teams including architecture, engineering, construction, and facility management. Participants will gain hands-on expertise in clash detection, quantity take-off, construction sequencing, cost integration, and sustainability analysis. By focusing on mega project execution strategies, this course prepares professionals to manage complex datasets, streamline stakeholder coordination, and drive data-driven decision-making in high-value infrastructure projects using globally recognized BIM standards and trending digital construction methodologies.

Course Duration

5 days

Course Objectives

1. Master BIM 3D modeling workflows for mega infrastructure projects
2. Implement 4D construction sequencing and scheduling integration
3. Develop 5D cost estimation and budget control systems
4. Perform advanced clash detection and coordination management
5. Apply digital twin technology for asset lifecycle management
6. Enhance project delivery using cloud-based BIM collaboration platforms
7. Integrate sustainability and green building analytics in BIM models
8. Optimize workflows using AI-driven construction automation tools
9. Understand ISO 19650 BIM standards and global compliance frameworks
10. Execute multi-disciplinary coordination in mega project environments
11. Improve productivity through parametric and generative design modeling
12. Manage infrastructure using GIS-BIM integration technologies
13. Build expertise in construction risk analysis and predictive modeling

Target Audience

1. Civil Engineers and Structural Engineers
2. Architects and Urban Planners
3. Construction Project Managers
4. Quantity Surveyors and Cost Engineers
5. MEP (Mechanical, Electrical, Plumbing) Engineers
6. BIM Coordinators and BIM Managers
7. Infrastructure Development Consultants
8. Government and Mega Project Stakeholders

Course Modules

Module 1: Introduction to BIM for Mega Projects

- BIM fundamentals and global trends
- BIM maturity levels and standards
- Stakeholder roles in mega projects
- BIM execution planning (BEP)
- Overview of digital construction ecosystems
- **Case Study:** BIM implementation in a large international airport development project

Module 2: Advanced 3D BIM Modeling

- Parametric modeling techniques
- Multi-disciplinary model integration
- Structural and architectural coordination
- Object libraries and customization
- Model validation techniques
- **Case Study:** High-rise smart city tower modeling and coordination

Module 3: 4D Construction Planning & Scheduling

- Linking BIM with project schedules
- Time-based simulation techniques
- Construction phasing optimization
- Resource allocation modeling
- Delay analysis and mitigation
- **Case Study:** Highway expansion project 4D simulation and sequencing

Module 4: 5D Cost Estimation & Budget Control

- Quantity take-off automation
- Cost database integration
- Budget forecasting techniques
- Value engineering using BIM
- Financial risk analysis
- **Case Study:** Industrial plant cost optimization using 5D BIM

Module 5: Clash Detection & Coordination

- Interdisciplinary clash analysis
- Navisworks coordination workflows
- Issue tracking systems
- Model federation techniques
- Coordination meeting protocols
- **Case Study:** Metro rail underground tunnel coordination conflict resolution

Module 6: BIM for Infrastructure & Mega Projects

- Roads, bridges, and rail BIM workflows
- Utility and drainage modeling
- Large-scale infrastructure mapping
- GIS integration techniques
- Terrain and topography modeling
- **Case Study:** Smart highway corridor infrastructure BIM execution

Module 7: Digital Twin & Facility Management

- Concept of digital twin ecosystems
- Real-time asset monitoring
- IoT integration with BIM
- Predictive maintenance modeling
- Lifecycle asset management

- **Case Study:** Smart airport terminal digital twin implementation

Module 8: BIM Collaboration & Cloud Platforms

- Cloud-based BIM workflows
- Common Data Environment (CDE)
- Team collaboration strategies
- Data security and version control
- Global remote project coordination
- **Case Study:** Multi-country mega project collaboration using cloud BIM platform

Training Methodology

This course employs a participatory and hands-on approach to ensure practical learning, including:

- Interactive lectures and presentations.
- Group discussions and brainstorming sessions.
- Hands-on exercises using real-world datasets.
- Role-playing and scenario-based simulations.
- Analysis of case studies to bridge theory and practice.
- Peer-to-peer learning and networking.
- Expert-led Q&A sessions.
- Continuous feedback and personalized guidance.

Register as a group from 3 participants for a Discount

Send us an email: info@fineskilltrainingcenter.org or call +254769199797

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

- a. The participant must be conversant with English.
- b. Upon completion of training the participant will be issued with an Authorized Training Certificate
- c. Course duration is flexible and the contents can be modified to fit any number of days.
- d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.
- e. One-year post-training support Consultation and Coaching provided after the course.
- f. Payment should be done at least a week before commence of the training, to Fineskill Training Center account, as indicated in the invoice so as to enable us prepare better for you.

Upcoming Scheduled Sessions

Start Date	End Date	Location	Price
21 Sep 2026	25 Sep 2026	Online	\$1,000
21 Sep 2026	25 Sep 2026	Physical	\$1,500
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
