

Crime Mapping and Geospatial Analysis (GIS for Criminology) Training Course

Professional Development Training Course Outline

Category	Criminology	Duration	10 Days
Base Fee	\$3,000 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

Training Course on Crime Mapping & Geospatial Analysis (GIS for Criminology) is a cutting-edge program designed to empower professionals in the criminal justice and public safety sectors with advanced skills in spatial data analysis. With rising crime rates and evolving criminal patterns, understanding the geospatial dimensions of crime has become critical. This course introduces participants to GIS technology, hotspot mapping, and predictive analytics to detect, visualize, and prevent crime. It blends criminology, data science, and digital forensics to transform how law enforcement and policy experts engage with crime data.

Participants will gain hands-on experience using industry-standard GIS tools and learn to interpret geographical crime trends, develop crime prevention strategies, and support evidence-based policing. This course is essential for professionals aiming to enhance their spatial analysis capabilities and improve community safety using real-time, data-driven insights.

Programme Curriculum

Crime Mapping and Geospatial Analysis (GIS for Criminology) Training Course

Introduction

Crime Mapping and Geospatial Analysis (GIS for Criminology) Training Course is a cutting-edge program designed to empower professionals in the criminal justice and public safety sectors with advanced skills in spatial data analysis. With rising crime rates and evolving criminal patterns, understanding the geospatial dimensions of crime has become critical. This course introduces participants to GIS technology, hotspot mapping, and predictive analytics to detect, visualize, and prevent crime. It blends criminology, data science, and digital forensics to transform how law enforcement and policy experts engage with crime data.

Participants will gain hands-on experience using industry-standard GIS tools and learn to interpret geographical crime trends, develop crime prevention strategies, and support evidence-based policing. This course is essential for professionals

aiming to enhance their spatial analysis capabilities and improve community safety using real-time, data-driven insights.

Course Objectives

1. Understand the fundamentals of Geographic Information Systems (GIS) in criminology.
2. Apply spatial analysis to identify crime hotspots.
3. Use predictive policing models for crime forecasting.
4. Interpret crime mapping data for tactical decision-making.
5. Integrate location-based data with traditional crime statistics.
6. Develop data visualization skills using GIS platforms.
7. Implement evidence-based strategies for crime reduction.
8. Analyze urban infrastructure's impact on criminal behavior.
9. Create customizable crime dashboards for real-time monitoring.
10. Evaluate the effectiveness of community policing initiatives using GIS.
11. Leverage big data in criminal justice for strategic planning.
12. Use GIS for emergency response and resource allocation.
13. Design and present spatial crime reports for stakeholders.

Target Audience

1. Law enforcement officers
2. Crime analysts and criminologists
3. Urban planners and city officials
4. Intelligence analysts
5. Public safety professionals
6. Criminal justice researchers
7. Emergency response coordinators
8. Policy makers and security consultants

Course Duration: 10 days

Course Modules

Module 1: Introduction to GIS in Criminology

- Definition and scope of GIS in criminology
- History and evolution of crime mapping
- GIS platforms overview (ArcGIS, QGIS)
- Importance of spatial thinking
- Basic tools and map creation
- *Case Study: Mapping burglary incidents in an urban neighborhood*

Module 2: Data Collection for Crime Mapping

- Crime data sources (UCR, NIBRS, local databases)
- Geocoding and data validation
- Accuracy and reliability of data
- Legal and ethical considerations
- Integrating spatial and non-spatial data
- *Case Study: Real-time data integration in a smart city initiative*

Module 3: Crime Pattern Analysis

- Understanding repeat victimization
- Temporal and spatial clustering

- Theories of crime distribution (e.g., Routine Activity Theory)
- Pattern detection techniques
- Interpretation of crime heatmaps
- *Case Study: Street robbery clusters in metropolitan areas*

Module 4: Hotspot Mapping Techniques

- Kernel density estimation (KDE)
- Spatial autocorrelation (Moran's I)
- Standard deviational ellipse
- Techniques comparison
- Visualizing crime concentrations
- *Case Study: Gang violence hotspots in LA neighborhoods*

Module 5: Predictive Policing and Forecasting

- Predictive models overview (machine learning and regression)
- Temporal forecasting
- Spatial risk terrain modeling
- Evaluation metrics for accuracy
- Challenges and controversies
- *Case Study: Predicting car thefts using logistic regression models*

Module 6: Spatial Criminological Theories

- Crime pattern theory
- Broken windows theory
- Environmental criminology
- Routine activity theory
- Situational crime prevention
- *Case Study: Application of CPTED in inner-city revitalization*

Module 7: GIS Tools for Law Enforcement

- Dashboard creation
- Real-time surveillance integration
- Automated alerts and notifications
- Command center mapping
- Mobile GIS apps
- *Case Study: GIS use in police patrol management*

Module 8: Environmental and Social Correlates of Crime

- Mapping poverty and crime
- Correlation analysis with land use
- Social disorganization theory in mapping
- Neighborhood disorder indicators
- Infrastructure and accessibility
- *Case Study: Housing inequality and violent crime mapping*

Module 9: Urban Planning and Crime Prevention

- Zoning and spatial planning
- Street design and surveillance
- Transit systems and crime
- Mixed-use development analysis

- Planning safe public spaces
- *Case Study: Transit-oriented development and reduced theft rates*

Module 10: GIS in Emergency Response

- Crime and natural disasters
- Crisis mapping during emergencies
- Evacuation and response planning
- Crime spikes post-disaster
- Coordination with emergency agencies
- *Case Study: Post-earthquake crime mapping in Haiti*

Module 11: Community Policing and GIS

- Community-based data collection
- Participatory mapping
- GIS for neighborhood watch programs
- Transparency and accountability
- Building public trust with maps
- *Case Study: GIS-supported community policing in Chicago*

Module 12: Legal and Ethical Aspects

- Data privacy in crime mapping
- Bias in predictive policing
- Legal frameworks for data use
- Community consent and involvement
- Transparency in algorithm design
- *Case Study: ACLU challenges to predictive policing systems*

Module 13: Visualization and Reporting

- Dashboard development
- Report generation
- Stakeholder presentation techniques
- Story maps
- Infographics in crime reporting
- *Case Study: Public crime dashboards in UK police forces*

Module 14: GIS for Terrorism and Organized Crime

- Spatial analysis of terror cells
- Mapping transnational crime networks
- Intelligence mapping
- Border surveillance
- Geo-fencing and tracking
- *Case Study: Tracking cartel movements across U.S.-Mexico border*

Module 15: Capstone Project & Presentation

- Designing a spatial crime analysis project
- Data collection and GIS mapping
- Strategy proposal based on findings
- Class presentation and peer feedback
- Final assessment and review
- *Case Study: Participant-led project on local crime reduction using GIS*

Training Methodology

- Interactive instructor-led sessions
- Hands-on GIS lab exercises
- Group case study presentations
- Peer-reviewed spatial analysis projects
- Quizzes and self-assessment tools
- Final capstone project with expert feedback

Register as a group from 3 participants for a Discount

Send us an email: info@fineskilltrainingcenter.org or call +254769199797

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

- a. The participant must be conversant with English.
- b. Upon completion of training the participant will be issued with an Authorized Training Certificate
- c. Course duration is flexible and the contents can be modified to fit any number of days.
- d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.
- e. One-year post-training support Consultation and Coaching provided after the course.
- f. Payment should be done at least a week before commence of the training, to Fineskill Training Center account, as indicated in the invoice so as to enable us prepare better for you.

Upcoming Scheduled Sessions

Start Date	End Date	Location	Price
21 Sep 2026	02 Oct 2026	Online	\$2,000
21 Sep 2026	02 Oct 2026	Physical	\$3,000
21 Sep 2026	02 Oct 2026	Physical	\$0
21 Sep 2026	02 Oct 2026	Physical	\$0
21 Sep 2026	02 Oct 2026	Physical	\$0

Start Date	End Date	Location	Price
21 Sep 2026	02 Oct 2026	Physical	\$0
21 Sep 2026	02 Oct 2026	Physical	\$0
21 Sep 2026	02 Oct 2026	Physical	\$0
