

EViews for Econometrics Training Course

Professional Development Training Course Outline

Category	Research and Data Analysis	Duration	10 Days
Base Fee	\$3,000 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

Econometric analysis has become a cornerstone for data-driven decision-making in economics, finance, and business analytics. The EViews software, renowned for its robust statistical and econometric capabilities, empowers professionals and researchers to efficiently model, forecast, and interpret complex economic data. EViews for Econometrics Training Course a comprehensive, hands-on experience, blending theoretical concepts with practical applications to ensure participants can leverage advanced econometric techniques, including time series analysis, panel data modeling, and forecasting, to drive actionable insights.

In today's fast-paced data landscape, mastering EViews is essential for professionals seeking to enhance their analytical toolkit. This training emphasizes real-world applications, from financial modeling and macroeconomic forecasting to policy evaluation and market research. Participants will gain proficiency in data manipulation, regression modeling, hypothesis testing, and visualization, equipping them with the skills to solve practical econometric problems. With interactive sessions and case-based learning, this course ensures that learners not only understand econometric theory but also confidently apply it using EViews.

Programme Curriculum

EViews for Econometrics Training Course

Introduction

Econometric analysis has become a cornerstone for data-driven decision-making in economics, finance, and business analytics. The EViews software, renowned for its robust statistical and econometric capabilities, empowers professionals and researchers to efficiently model, forecast, and interpret complex economic data. EViews for Econometrics Training Course a comprehensive, hands-on experience, blending theoretical concepts with practical applications to ensure participants can leverage advanced econometric techniques,

including time series analysis, panel data modeling, and forecasting, to drive actionable insights.

In today's fast-paced data landscape, mastering EViews is essential for professionals seeking to enhance their analytical toolkit. This training emphasizes real-world applications, from financial modeling and macroeconomic forecasting to policy evaluation and market research. Participants will gain proficiency in data manipulation, regression modeling, hypothesis testing, and visualization, equipping them with the skills to solve practical econometric problems. With interactive sessions and case-based learning, this course ensures that learners not only understand econometric theory but also confidently apply it using EViews.

Course Duration

10 days

Course Objectives

By the end of this course, participants will be able to:

1. Master EViews interface and data management for efficient econometric analysis.
2. Conduct linear and nonlinear regression modeling with real-world datasets.
3. Apply time series econometrics including ARIMA, VAR, and cointegration models.
4. Perform panel data analysis for cross-sectional and longitudinal studies.
5. Forecast economic and financial indicators using predictive modeling techniques.
6. Conduct hypothesis testing, correlation, and causality analysis in EViews.
7. Utilize dynamic modeling and simulation to evaluate economic scenarios.
8. Interpret and visualize data trends with advanced charts and graphs.
9. Implement model diagnostics and goodness-of-fit evaluation.
10. Solve real-world business and policy problems using econometric solutions.
11. Enhance decision-making using risk analysis and financial modeling tools.
12. Integrate EViews outputs with Excel, Python, and other analytical tools.
13. Develop research and reporting skills for academic and corporate projects.

Target Audience

1. Economists and economic researchers
2. Data analysts and data scientists
3. Financial analysts and investment managers
4. Policy makers and government officials
5. Academicians and university students in economics/finance
6. Market researchers and business consultants
7. Professionals in banking and insurance sectors
8. Entrepreneurs and business strategy professionals

Course Modules

Module 1: Introduction to EViews

- Overview of EViews interface and navigation
- Importing, managing, and cleaning datasets
- Understanding workfiles, series, and objects
- Data visualization basics
- Case Study: Importing macroeconomic datasets and creating summary statistics

Module 2: Fundamentals of Econometrics

- Introduction to econometric theory
- Simple and multiple regression concepts
- Assumptions of classical linear regression
- Interpreting regression outputs in EViews
- Case Study: Regression analysis of GDP vs. investment data

Module 3: Data Management and Transformation

- Creating and manipulating series
- Generating lagged and differenced variables
- Data transformations for stationarity
- Handling missing values and outliers
- Case Study: Cleaning and preparing inflation dataset

Module 4: Time Series Analysis

- Introduction to time series econometrics
- Stationarity tests: ADF, KPSS
- AR, MA, ARMA modeling
- Model selection criteria: AIC, BIC
- Case Study: Forecasting exchange rates

Module 5: ARIMA Modeling

- Identifying ARIMA(p,d,q) models
- Estimating ARIMA models in EViews
- Diagnostic checking of residuals
- Forecasting with ARIMA
- Case Study: Predicting monthly stock prices

Module 6: Vector Autoregression (VAR)

- Concept of VAR models
- Estimation and interpretation
- Impulse response and variance decomposition
- Model stability checks
- Case Study: Analyzing GDP, inflation, and interest rates interactions

Module 7: Cointegration and Error Correction Models

- Testing for cointegration
- Estimating error correction models (ECM)
- Long-run and short-run relationships
- Application in macroeconomic modeling
- Case Study: Modeling consumption and income relationship

Module 8: Panel Data Analysis

- Fixed effects and random effects models
- Pooled OLS vs. panel models

- Hausman test for model selection
- Application in firm-level and country-level data
- Case Study: Productivity analysis across firms

Module 9: Hypothesis Testing

- t-test, F-test, and Chi-square test in regression
- Testing coefficients and model significance
- Confidence intervals interpretation
- Case Study: Wage determinants study

Module 10: Forecasting Techniques

- Moving averages and exponential smoothing
- Univariate vs. multivariate forecasting
- Accuracy evaluation
- Scenario analysis and predictive modeling
- Case Study: Forecasting inflation rates

Module 11: Model Diagnostics

- Checking multicollinearity, autocorrelation, heteroskedasticity
- Residual analysis
- Model refinement techniques
- Case Study: Improving regression model fit

Module 12: Financial Econometrics

- Stock returns and volatility modeling
- GARCH models for risk estimation
- Portfolio performance analysis
- Case Study: Volatility forecasting of stock indices

Module 13: Macroeconomic Modeling

- Structural modeling of macroeconomic variables
- Simulation of policy changes
- Scenario planning using EViews
- Case Study: Fiscal policy impact on GDP

Module 14: Reporting and Visualization

- Advanced graphs and charts
- Creating tables and dashboards
- Exporting results to Excel and Word
- Case Study: Preparing investment report with visual insights

Module 15: Integrative Capstone Project

- Real-world dataset analysis
- Model selection, estimation, and diagnostics
- Forecasting and scenario analysis
- Presentation of results and recommendations

- Case Study: Comprehensive econometric analysis of a country's economic indicators

Training Methodology

This course employs a participatory and hands-on approach to ensure practical learning, including:

- Interactive lectures and presentations.
- Group discussions and brainstorming sessions.
- Hands-on exercises using real-world datasets.
- Role-playing and scenario-based simulations.
- Analysis of case studies to bridge theory and practice.
- Peer-to-peer learning and networking.
- Expert-led Q&A sessions.
- Continuous feedback and personalized guidance.

Register as a group from 3 participants for a Discount

Send us an email: info@fineskilltrainingcenter.org or call +254769199797

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

- a. The participant must be conversant with English.
- b. Upon completion of training the participant will be issued with an Authorized Training Certificate
- c. Course duration is flexible and the contents can be modified to fit any number of days.
- d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.
- e. One-year post-training support Consultation and Coaching provided after the course.
- f. Payment should be done at least a week before commence of the training, to Fineskill Training Center account, as indicated in the invoice so as to enable us prepare better for you.

Upcoming Scheduled Sessions

Start Date	End Date	Location	Price
------------	----------	----------	-------

21 Sep 2026	02 Oct 2026	Online	\$2,000
21 Sep 2026	02 Oct 2026	Physical	\$3,000
21 Sep 2026	02 Oct 2026	Physical	\$0
21 Sep 2026	02 Oct 2026	Physical	\$0
21 Sep 2026	02 Oct 2026	Physical	\$0
21 Sep 2026	02 Oct 2026	Physical	\$0
21 Sep 2026	02 Oct 2026	Physical	\$0
21 Sep 2026	02 Oct 2026	Physical	\$0
