

HR Analytics in Workforce Data and Predictive Models Training Course

Professional Development Training Course Outline

Category	Research and Data Analysis	Duration	5 Days
Base Fee	\$1,500 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

In the modern digital workforce era, HR Analytics has emerged as a game-changer in strategic decision-making and workforce planning. HR Analytics in Workforce Data and Predictive Models Training Course is designed to empower HR professionals, data analysts, and decision-makers with actionable insights derived from workforce data. By integrating people analytics, predictive modeling, and data-driven talent strategies, this training course transforms raw HR data into powerful business intelligence for talent acquisition, performance management, retention strategies, and organizational effectiveness.

Through real-world case studies, hands-on projects, and cutting-edge analytical tools, participants will explore the full lifecycle of HR data — from collection and cleansing to analysis and actionable insights. With increasing demand for HR professionals who can decode trends in employee behavior and forecast workforce needs, this course equips you with critical skills in predictive modeling, data visualization, and ethical AI use in HR. Whether you’re modernizing your HR strategy or launching a people analytics function, this course will drive measurable business impact.
