

Minitab for Quality Research Training Course

Professional Development Training Course Outline

Category	Research and Data Analysis	Duration	5 Days
Base Fee	\$1,500 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

In today's data-driven landscape, mastering statistical analysis tools is no longer optional it's essential. Minitab for Quality Research Training Course equips professionals with practical skills to leverage advanced statistical methods, data visualization, and quality improvement techniques for actionable insights. Participants will gain hands-on experience in process optimization, hypothesis testing, regression analysis, and Six Sigma methodologies, transforming raw data into strategic business decisions.

This training is designed for individuals and organizations seeking to elevate their quality research capabilities, enhance process efficiency, and drive operational excellence. By integrating real-world case studies, interactive exercises, and step-by-step guidance, the course ensures that participants not only understand statistical concepts but also apply them effectively to solve complex quality problems, reduce defects, and achieve continuous improvement goals.

Programme Curriculum

Minitab for Quality Research Training Course

Introduction

In today's data-driven landscape, mastering statistical analysis tools is no longer optional it's essential. Minitab for Quality Research Training Course equips professionals with practical skills to leverage advanced statistical methods, data visualization, and quality improvement techniques for actionable insights. Participants will gain hands-on experience in process optimization, hypothesis testing, regression analysis, and Six Sigma methodologies, transforming raw data into strategic business decisions.

This training is designed for individuals and organizations seeking to elevate their quality research capabilities, enhance process efficiency, and drive operational excellence. By integrating real-world case studies, interactive exercises, and step-by-step guidance, the course ensures that participants not only understand statistical

concepts but also apply them effectively to solve complex quality problems, reduce defects, and achieve continuous improvement goals.

Course Duration

5 days

Course Objectives

1. Master Minitab software tools for data analysis and visualization.
2. Perform descriptive and inferential statistical analysis for quality research.
3. Understand and apply hypothesis testing in real-world scenarios.
4. Conduct regression and correlation analysis for process improvement.
5. Analyze and interpret control charts for quality monitoring.
6. Implement Six Sigma methodologies using Minitab.
7. Perform design of experiments (DOE) for process optimization.
8. Utilize capability analysis to measure performance and compliance.
9. Identify and reduce process variation and defects.
10. Integrate predictive analytics for strategic decision-making.
11. Enhance data-driven decision-making skills.
12. Solve quality research challenges through hands-on projects.
13. Develop actionable insights using trend analysis and visualization.

Target Audience

1. Quality Analysts and Engineers
2. Six Sigma Professionals
3. Process Improvement Managers
4. Data Analysts and Statisticians
5. Operations Managers
6. Research and Development Professionals
7. Manufacturing Professionals
8. Academicians and Students in Quality Management

Course Modules

Module 1: Introduction to Minitab & Quality Research

- Overview of Minitab software and interface
- Importance of statistical analysis in quality research
- Data entry, manipulation, and cleaning techniques
- Basic descriptive statistics and data visualization
- **Case Study:** Analyzing manufacturing defect data to identify trends

Module 2: Descriptive and Inferential Statistics

- Measures of central tendency and variability
- Frequency distributions and histograms
- Probability distributions and sampling techniques
- Confidence intervals and significance testing
- **Case Study:** Customer satisfaction survey analysis

Module 3: Hypothesis Testing & ANOVA

- Formulating null and alternative hypotheses
- One-sample and two-sample tests
- ANOVA for comparing multiple groups
- p-values and decision-making criteria
- **Case Study:** Product performance comparison across multiple plants

Module 4: Regression & Correlation Analysis

- Simple and multiple linear regression
- Correlation analysis to identify relationships
- Residual analysis for model accuracy
- Predictive modeling for process improvement
- **Case Study:** Reducing production defects using regression models

Module 5: Control Charts & Process Monitoring

- Introduction to Statistical Process Control (SPC)
- Creating and interpreting control charts
- Identifying process variations and trends
- Rules for detecting out-of-control processes
- **Case Study:** Monitoring machine performance in real time

Module 6: Capability Analysis & Process Improvement

- Cp, Cpk, and process capability indices
- Measuring process performance and compliance
- Benchmarking against industry standards
- Identifying improvement areas for operational efficiency
- **Case Study:** Improving assembly line capability

Module 7: Design of Experiments (DOE)

- Introduction to factorial and fractional factorial designs
- Planning, conducting, and analyzing experiments
- Identifying critical factors influencing quality
- Optimization techniques for process improvement
- **Case Study:** Experimenting with packaging processes to reduce defects

Module 8: Six Sigma & Quality Research Projects

- Overview of Six Sigma DMAIC methodology
- Integrating Minitab into Six Sigma projects
- Real-life project implementation and tracking
- Data-driven decision making for quality excellence
- **Case Study:** Successful Six Sigma project in automotive manufacturing

Training Methodology

This course employs a participatory and hands-on approach to ensure practical learning, including:

- Interactive lectures and presentations.
- Group discussions and brainstorming sessions.
- Hands-on exercises using real-world datasets.
- Role-playing and scenario-based simulations.
- Analysis of case studies to bridge theory and practice.
- Peer-to-peer learning and networking.
- Expert-led Q&A sessions.
- Continuous feedback and personalized guidance.

Register as a group from 3 participants for a Discount

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

- The participant must be conversant with English.
- Upon completion of training the participant will be issued with an Authorized Training Certificate
- Course duration is flexible and the contents can be modified to fit any number of days.
- The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.
- One-year post-training support Consultation and Coaching provided after the course.
- Payment should be done at least a week before commence of the training, to Fineskill Training Center account, as indicated in the invoice so as to enable us prepare better for you.

Upcoming Scheduled Sessions

Start Date	End Date	Location	Price
21 Sep 2026	25 Sep 2026	Online	\$1,000
21 Sep 2026	25 Sep 2026	Physical	\$1,500
21 Sep 2026	25 Sep 2026	Physical	\$0

Start Date	End Date	Location	Price
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
