

Pavement Asset Management Training Course

Professional Development Training Course Outline

Category	Construction Institute	Duration	5 Days
Base Fee	\$1,500 USD	Delivery Mode	Online / On-site Hybrid

Course Introduction

Pavement Asset Management is a strategic approach that integrates data-driven decision-making, predictive analytics, lifecycle planning, and sustainable infrastructure management to maximize pavement performance, safety, and value. Pavement Asset Management Training Course equips professionals with the knowledge and practical skills required to implement modern pavement asset management systems, optimize maintenance investments, and improve transportation network resilience. Participants will explore AI-enabled pavement monitoring, GIS-based asset inventories, pavement condition assessment, performance modeling, risk-based maintenance strategies, and digital infrastructure management aligned with global best practices.

With increasing demand for smart transportation networks, sustainable road infrastructure, climate-resilient pavements, and cost-effective maintenance solutions, organizations require specialists who can manage pavement assets throughout their lifecycle. This course combines engineering principles, emerging technologies, real-world applications, and international case studies to develop expertise in strategic pavement management planning, asset valuation, predictive maintenance, and infrastructure performance optimization.

Programme Curriculum

Pavement Asset Management Training Course

Introduction

Pavement Asset Management is a strategic approach that integrates data-driven decision-making, predictive analytics, lifecycle planning, and sustainable infrastructure management to maximize pavement performance, safety, and value. Pavement Asset Management Training Course equips professionals with the knowledge and practical skills required to implement modern pavement asset management systems, optimize maintenance investments, and improve transportation network resilience. Participants will explore AI-enabled pavement

monitoring, GIS-based asset inventories, pavement condition assessment, performance modeling, risk-based maintenance strategies, and digital infrastructure management aligned with global best practices.

With increasing demand for smart transportation networks, sustainable road infrastructure, climate-resilient pavements, and cost-effective maintenance solutions, organizations require specialists who can manage pavement assets throughout their lifecycle. This course combines engineering principles, emerging technologies, real-world applications, and international case studies to develop expertise in strategic pavement management planning, asset valuation, predictive maintenance, and infrastructure performance optimization.

Course Duration

5 days

Course Objectives

By the end of this training program, participants will be able to:

1. Understand the principles of Pavement Asset Management Systems (PAMS) and their role in modern infrastructure management.
2. Apply lifecycle cost analysis (LCCA) techniques for optimized pavement investment decisions.
3. Develop effective pavement inventory databases and asset information management systems.
4. Implement advanced pavement condition assessment and performance monitoring techniques.
5. Utilize GIS, BIM, IoT, and digital twin technologies for pavement asset management.
6. Apply predictive analytics and AI-based pavement deterioration modeling.
7. Develop strategic maintenance and rehabilitation programs using risk-based approaches.
8. Optimize road maintenance budgets through data-driven asset prioritization.
9. Understand climate-resilient pavement design and sustainable infrastructure practices.
10. Evaluate pavement performance using KPIs, performance indicators, and benchmarking systems.
11. Apply decision-support tools for transportation asset management.
12. Analyze international pavement management frameworks and best practices.
13. Develop integrated smart road asset management strategies for future mobility networks.

Target Audience

1. Highway engineers and transportation professionals
2. Pavement design and maintenance specialists
3. Road asset managers and infrastructure planners
4. Government transportation authorities and municipalities
5. Civil engineering consultants and contractors
6. GIS, BIM, and digital infrastructure professionals
7. Project managers involved in road infrastructure investments
8. Researchers and academics in transportation engineering

Course Modules

Module 1: Fundamentals of Pavement Asset Management

- Principles and concepts of **pavement asset management frameworks**
- Role of asset management in sustainable transportation infrastructure
- Pavement lifecycle stages and asset value optimization
- International standards and asset management practices
- Developing organizational asset management strategies

- **Case Study: United States Highway Pavement Management Programs**

Module 2: Pavement Inventory and Data Management

- Pavement inventory development and asset data collection
- GIS-based pavement asset information systems
- Mobile data collection and automated surveys
- Data quality management and interoperability
- Creating digital pavement asset databases
- **Case Study: UK Highways Asset Management Information Systems**

Module 3: Pavement Condition Assessment and Monitoring

- Pavement distress identification techniques
- Functional and structural pavement evaluation
- Automated pavement condition monitoring technologies
- AI-based image recognition for pavement defects
- Pavement Condition Index (PCI) methodologies
- **Case Study: AI-Based Road Condition Monitoring Projects**

Module 4: Pavement Performance Modeling and Predictive Analytics

- Pavement deterioration mechanisms
- Performance prediction models
- Machine learning applications in pavement management
- Digital twin concepts for infrastructure forecasting
- Predictive maintenance decision-making
- **Case Study: Smart Road Asset Analytics Programs**

Module 5: Maintenance and Rehabilitation Strategies

- Pavement preservation techniques
- Maintenance treatment selection methods
- Rehabilitation planning strategies
- Risk-based maintenance prioritization
- Optimizing maintenance schedules and budgets
- **Case Study: Australia Road Network Preservation Programs**

Module 6: Pavement Asset Investment Planning and Risk Management

- Lifecycle cost analysis techniques
- Asset valuation and investment planning
- Risk-based pavement management approaches
- Budget allocation optimization
- Performance-based investment strategies
- **Case Study: European Transportation Infrastructure Investment Models**

Module 7: Sustainable and Climate-Resilient Pavement Asset Management

- Sustainable pavement technologies
- Climate impacts on pavement performance
- Low-carbon pavement solutions

- Circular economy approaches in road construction
- Resilient infrastructure planning
- **Case Study: Green Highway Infrastructure Initiatives**

Module 8: Future Trends in Smart Pavement Asset Management

- Internet of Things (IoT) for pavement monitoring
- Smart sensors and connected infrastructure
- BIM-GIS integration for asset management
- Digital twin applications
- Future trends in autonomous infrastructure management
- **Case Study: Smart City Road Asset Management Projects**

Training Methodology

This course employs a participatory and hands-on approach to ensure practical learning, including:

- Interactive lectures and presentations.
- Group discussions and brainstorming sessions.
- Hands-on exercises using real-world datasets.
- Role-playing and scenario-based simulations.
- Analysis of case studies to bridge theory and practice.
- Peer-to-peer learning and networking.
- Expert-led Q&A sessions.
- Continuous feedback and personalized guidance.

Register as a group from 3 participants for a Discount

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

- a. The participant must be conversant with English.
- b. Upon completion of training the participant will be issued with an Authorized Training Certificate
- c. Course duration is flexible and the contents can be modified to fit any number of days.
- d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.
- e. One-year post-training support Consultation and Coaching provided after the course.
- f. Payment should be done at least a week before commencement of the training, to Fineskill Training Center account, as indicated in the invoice so as to enable us prepare better for you.

Upcoming Scheduled Sessions

Start Date	End Date	Location	Price
21 Sep 2026	25 Sep 2026	Online	\$1,000
21 Sep 2026	25 Sep 2026	Physical	\$1,500
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
21 Sep 2026	25 Sep 2026	Physical	\$0
