

# Smart City Mobility Integration and Safety Training Course

## Professional Development Training Course Outline

|          |                                  |               |                         |
|----------|----------------------------------|---------------|-------------------------|
| Category | Traffic Management & Road Safety | Duration      | 5 Days                  |
| Base Fee | \$1,500 USD                      | Delivery Mode | Online / On-site Hybrid |

### Course Introduction

Urban transportation is undergoing a transformative shift with the rise of smart cities, driven by digitalization, automation, and sustainable mobility solutions. Smart City Mobility Integration and Safety Training Course equips professionals with the latest tools, strategies, and safety protocols to design, implement, and manage intelligent urban transport systems. This course emphasizes data-driven mobility planning, IoT-enabled transport management, AI-based traffic optimization, and real-time safety monitoring, preparing participants to address modern urban challenges effectively.

With the growing demand for connected transport infrastructure, autonomous vehicles, multimodal integration, and smart traffic systems, this training bridges the gap between emerging technologies and operational efficiency. Participants will explore practical case studies, hands-on simulations, and innovative solutions for reducing congestion, enhancing pedestrian safety, and integrating public and private mobility networks. By the end of the course, learners will be proficient in deploying intelligent mobility systems while ensuring safety, sustainability, and compliance with urban transport regulations.

### Programme Curriculum

#### Smart City Mobility Integration and Safety Training Course

##### Introduction

Urban transportation is undergoing a transformative shift with the rise of smart cities, driven by digitalization, automation, and sustainable mobility solutions. Smart City Mobility Integration and Safety Training Course equips professionals with the latest tools, strategies, and safety protocols to design, implement, and manage intelligent urban transport systems. This course emphasizes data-driven mobility planning, IoT-enabled transport management, AI-based traffic optimization, and real-time safety monitoring, preparing participants to

address modern urban challenges effectively.

With the growing demand for connected transport infrastructure, autonomous vehicles, multimodal integration, and smart traffic systems, this training bridges the gap between emerging technologies and operational efficiency. Participants will explore practical case studies, hands-on simulations, and innovative solutions for reducing congestion, enhancing pedestrian safety, and integrating public and private mobility networks. By the end of the course, learners will be proficient in deploying intelligent mobility systems while ensuring safety, sustainability, and compliance with urban transport regulations.

### **Course Duration**

5 days

### **Course Objectives**

1. Understand the fundamentals of smart city mobility ecosystems.
2. Analyze data-driven urban transport planning strategies.
3. Evaluate intelligent traffic management systems and their applications.
4. Integrate IoT and AI technologies into urban mobility networks.
5. Implement multimodal transport integration solutions.
6. Enhance public transport safety and efficiency.
7. Assess autonomous vehicle integration into urban roads.
8. Develop sustainable and eco-friendly mobility initiatives.
9. Identify cybersecurity risks in smart transport systems.
10. Utilize real-time mobility monitoring tools.
11. Apply predictive analytics for congestion and safety management.
12. Examine urban mobility case studies and best practices.
13. Foster collaboration between public and private transport stakeholders.

### **Target Audience**

1. Urban planners and city developers
2. Transport engineers and traffic managers
3. Public safety and law enforcement officials
4. Smart city consultants
5. Mobility solution providers
6. Technology developers for IoT and AI transport applications
7. Policy makers and government authorities
8. Sustainability and urban infrastructure professionals

### **Course Modules**

#### **Module 1: Introduction to Smart City Mobility**

- Definition and scope of smart city mobility
- Urban mobility trends and challenges
- Role of **digital transformation in transport**
- Key technologies: IoT, AI, Big Data
- Case Study: **Barcelona Smart Traffic Management**

#### **Module 2: Intelligent Traffic Management Systems**

- Real-time traffic monitoring solutions
- Adaptive signal control technologies
- AI-driven traffic prediction models
- Smart intersections and corridor management
- Case Study: **Singapore Smart Traffic Control**

### **Module 3: Multimodal Transport Integration**

- Combining public and private mobility networks
- Seamless payment systems and mobility apps
- Bicycle and pedestrian infrastructure integration
- Last-mile connectivity solutions
- Case Study: **Amsterdam Integrated Mobility Plan**

### **Module 4: Autonomous Vehicles & Safety Protocols**

- AV technology overview and urban deployment
- Vehicle-to-Infrastructure (V2I) communication
- Safety risk assessment and mitigation
- Regulatory frameworks for AVs
- Case Study: **Phoenix AV Pilot Program**

### **Module 5: Data-Driven Urban Transport Planning**

- Big data collection and analysis
- Traffic flow optimization
- Predictive modeling for congestion management
- AI-enabled decision support systems
- Case Study: **Los Angeles Smart Mobility Project**

### **Module 6: Cybersecurity in Smart Mobility**

- Threats in connected transport systems
- Data privacy and compliance
- Secure communication protocols
- Incident response strategies
- Case Study: **Estonia Cybersecure Transport Network**

### **Module 7: Sustainable Mobility Solutions**

- Electric vehicles and charging infrastructure
- Green transport policies and incentives
- Emission monitoring and reduction strategies
- Sustainable urban transport planning
- Case Study: **Copenhagen Green Mobility Program**

### **Module 8: Mobility Safety & Emergency Management**

- Safety standards and risk assessment
- Smart surveillance and monitoring systems
- Emergency response integration
- Public awareness and safety campaigns

- Case Study: **Tokyo Disaster-Resilient Transport System**

## Training Methodology

This course employs a participatory and hands-on approach to ensure practical learning, including:

- Interactive lectures and presentations.
- Group discussions and brainstorming sessions.
- Hands-on exercises using real-world datasets.
- Role-playing and scenario-based simulations.
- Analysis of case studies to bridge theory and practice.
- Peer-to-peer learning and networking.
- Expert-led Q&A sessions.
- Continuous feedback and personalized guidance.

### Register as a group from 3 participants for a Discount

Send us an email: [info@fineskilltrainingcenter.org](mailto:info@fineskilltrainingcenter.org) or call +254769199797

## Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

## Tailor-Made Course

We also offer tailor-made courses based on your needs.

## Key Notes

- a. The participant must be conversant with English.
- b. Upon completion of training the participant will be issued with an Authorized Training Certificate
- c. Course duration is flexible and the contents can be modified to fit any number of days.
- d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.
- e. One-year post-training support Consultation and Coaching provided after the course.
- f. Payment should be done at least a week before commence of the training, to Fineskill Training Center account, as indicated in the invoice so as to enable us prepare better for you.

## Upcoming Scheduled Sessions

| Start Date  | End Date    | Location | Price   |
|-------------|-------------|----------|---------|
| 21 Sep 2026 | 25 Sep 2026 | Online   | \$1,000 |
| 21 Sep 2026 | 25 Sep 2026 | Physical | \$1,500 |

| Start Date  | End Date    | Location | Price |
|-------------|-------------|----------|-------|
| 21 Sep 2026 | 25 Sep 2026 | Physical | \$0   |
| 21 Sep 2026 | 25 Sep 2026 | Physical | \$0   |
| 21 Sep 2026 | 25 Sep 2026 | Physical | \$0   |
| 21 Sep 2026 | 25 Sep 2026 | Physical | \$0   |
| 21 Sep 2026 | 25 Sep 2026 | Physical | \$0   |
| 21 Sep 2026 | 25 Sep 2026 | Physical | \$0   |
